SKILLS SUMMARY

- **Languages**:   HTML, CSS, JavaScript, Python, SQL
- **Frameworks**:   Bootstrap, Next.js, React.js, Angular, Tailwind
- **Tools**:   node.js, APIs, Excel, PowerPoint, Version Control, CMS
- **Platforms**:   Visual Studio Code, MySQL, Microsoft SSMS, GitHub, WordPress, Wix, Shopify
- **Interests:**   Software Engineering, Full-Stack Web Development, Data Analytics, UI/UX Design
- **Soft Skills:**   Problem-Solving, Analytical Thinking, Collaboration in Agile Teams, Attention to Software Architecture, Version Control, Continuous Learning of New Technologies

EXPERIENCE

Red Hat B.U.I.L.D. Program

- Participated in Red Hat mentorship program as a university student researcher, collaborating with Red Hat engineers on open research projects.
- Navigated open source projects and communities under mentor guidance, gaining insights into community dynamics and best practices.
- Made connections between theoretical learning and practical application, enhancing understanding of real-world problem-solving approaches.
- Contributed meaningfully to resolving real-world challenges through research and development activities.
- Received technical expertise from mentors while honing career skills such as setting achievable project scopes and timelines.
- Worked effectively as part of a team, learning to incorporate feedback and iterate on solutions.
- Focused on achieving personal goals with mentor support, fostering a results-driven mentoring relationship.
- Expanded professional network and knowledge base through mentorship, contributing to the evolution of open-source technologies.

PROJECTS

Portfolio Website | LINK

- Utilized Bootstrap framework to create a responsive and visually appealing portfolio website.
- Implemented Bootstrap's grid system and components for seamless compatibility across devices and browsers.
- Integrated custom styling and interactive elements to showcase proficiency in HTML, CSS, and JavaScript.
- Demonstrated knowledge of front-end development principles through polished and professional-grade design.
- Highlighted projects and skills with clarity and precision, enhancing user experience and engagement.

Weather App | LINK

- Created a weather app for websites that displays the current weather information like temperature, Weather condition, humidity and wind speed according to the city the user inputs.
- Languages demonstrated: HTML CSS and JavaScript.
- Used an API (OpenWeatherMap) to receive data.

EDUCATION

- **Wake Technical Community College,** Raleigh, NC **|** AS Computer Science & Information

- **Major**: Computer Science and Information
- **Expected Graduation Year**: Jan 2026
